# ThevoSleepingStar

# Bed time

Many children with special needs have sleep disorders or disturbances, affecting parents and other family members. These disorders include: issues with falling asleep and staying asleep, restlessness during sleep, as well as disorientation upon awakening. Sleep disorders affect a child's natural growth and development.

*“I was at the end of my rope and burned out emotionally. Nothing really helped. I am so glad that thanks to her ThevoSleepingStar my daughter is more refreshed and relaxed.”*

Proven by studies: [www.thevo.info](http://www.thevo.info)

## Improved sleep with the Sensory Support Mattress

- ✓ **MiS Micro-Stimulation® supports mobility**
- ✓ **Improves body perception**
- ✓ **Reduces spasms and pain**
- ✓ **Calms the child for restorative sleep**

**Cover**  
removable and easy to clean for optimal hygiene

**Wing suspensions**  
have a positive influence on the children's restless sleep by providing tiny movement impulses

**Mattress**  
is especially tailored for children with special needs to provide comfortable sensation of lying.

**Positioning suspension**  
soft sensation of lying → extended sleep phases  
is optimally tailored to the sleep and lying requirements of children with special needs
